

Grupa LuxVet poszerza sieć placówek - dołącza Przychodnia Weterynaryjna HELP w Zielonej Górze

LuxVet Group is strengthening its presence in the Lubusz region. The HELP Veterinary Clinic, one of the largest and most experienced animal clinics in Zielona Góra, operating continuously since 1992, has joined the Group.

Located at 44 Węgierska Street in Zielona Góra, the clinic has provided comprehensive veterinary care to companion animals and patients from surrounding towns for more than three decades. The HELP Veterinary Clinic has earned the trust of a wide community of pet owners thanks to its long-standing experience, high standards of treatment, and individualized approach to each patient.

The clinic is led by Dr. Maciej Koliński, DVM, a veterinary surgery specialist who has been practicing since 1988. The facility is supported by an experienced team of veterinarians, technicians, and specialists assisting in the treatment process, including an animal physiotherapist. Each year, the clinic performs hundreds of surgical procedures, providing care for both planned treatments and emergency cases.

HELP is equipped with extensive diagnostic and surgical facilities. The clinic includes three consultation rooms, an operating theatre, a post-operative recovery room, a diagnostic room equipped with X-ray, ultrasound, and ECG, as well as an in-house laboratory that allows tests to be performed on site. This enables rapid diagnostics and efficient initiation of treatment.

The clinic offers services across numerous veterinary specialties, including surgery and orthopedics, cardiology, neurology, ophthalmology, dentistry, dermatology, oncology, gynecology, and diagnostic imaging. The clinic also provides care for exotic animals. An important addition to the offering is the

newly opened animal rehabilitation center and grooming & SPA salon, supporting patients' recovery and comfort.

„Since the beginning of HELP Clinic's operations, our priority has been to provide animals with professional care based on experience, modern diagnostics, and genuine care for every patient. Joining the LuxVet Group gives us an opportunity for further growth and access to additional tools supporting our daily work, while maintaining the values we have built for over 30 years.” - said Dr. Maciej Koliński, founder of HELP Veterinary Clinic.

Integration with LuxVet Group will provide the clinic with support in administration, accounting, procurement, IT, and marketing. The clinic's team will also gain access to employee benefits and training programs delivered through LuxVet's educational platform. The collaboration will further strengthen the clinic's medical capabilities and support the continued development of services for patients in Zielona Góra and the surrounding region.

About the LuxVet Group

LuxVet is the leading veterinary platform in Central and Eastern Europe, bringing together around 70 clinics across the region. Since 2022, the Group has been actively consolidating the fragmented veterinary market and, thanks to rapid growth and a focused M&A strategy, has become the largest veterinary platform in the region. Its expansion into new markets reflects the growing demand for high-quality veterinary services and supports the vision of building an international network of clinics and hospitals.

The company follows a partnership-based integration strategy, supporting clinics rather than imposing top-down structures. It invests heavily in teams, advanced equipment, and professional training. Nearly 1,000 veterinary professionals have already benefited from in-person and online learning, ensuring continuous development and knowledge exchange across the network.

The Group also operates Veterio in Warsaw, Poland, the first referral hospital of its kind in this part of Europe, equipped with cutting-edge diagnostic and imaging technology. It employs several board-

certified specialists and expects to have around ten diplomates in the near future, further strengthening its expertise and ability to deliver world-class veterinary care.

With a clear focus on excellence, innovation, and education, LuxVet is helping shape the future of veterinary medicine in Central and Eastern Europe.
