

LuxVet Group strengthens its presence in Greater Poland – Veterinary Clinic RYŚ in Piła joins the Group

LuxVet Group is expanding its network in Poland with another strongly locally rooted veterinary practice. Veterinary Clinic RYŚ, located at 5 Podgórna Street in Piła, is joining the Group—a facility combining nearly 28 years of clinical experience with modern diagnostic infrastructure and a broad range of specialist services.

For years, RYŚ Veterinary Clinic has been developing a comprehensive model of animal care, focusing on an individualized approach to each patient and attention to their comfort. The foundation of the clinic’s activity is the motto “A humane approach to animals,” which translates into a partnership-based relationship with pet owners and high standards of service.

The clinic’s scope of services includes full preventive care, internal medicine, surgery, oncology, dermatology, ophthalmology, reproduction, dentistry, and treatment of exotic animals. The facility is equipped with imaging diagnostics (ultrasound and X-ray) and an in-house laboratory. A key area of activity is comprehensive care for oncology patients—from precise diagnostics and prognosis assessment to the selection of causal and symptomatic therapies, including effective cancer pain management.

An integral part of the clinic’s operations is the RYŚ pet shop, offering maintenance diets and veterinary prescription diets, supplements, grooming products, and items supporting animal health and wellbeing. The clinic also operates the “Psia Krew” Veterinary Blood Bank, supporting the treatment of patients requiring blood transfusions.

“Joining LuxVet Group is a natural stage of our development. Over the years, we have built a practice based on knowledge, experience, and respect for animals and their caregivers. Cooperation with the Group will allow us to further develop our clinic’s potential, invest in modern solutions, and more effectively fulfil our mission of providing comprehensive and responsible veterinary care,” emphasize the clinic’s founders, veterinarians Ryszard Solecki and Anna Białkowska.

Cooperation with LuxVet Group will provide the clinic with support in administration, accounting, procurement, IT, and marketing. The team will also gain access to employee benefits and training programs delivered through the LuxVet educational platform. This will further strengthen the clinic’s veterinary capabilities and support the development of services for patients in Piła and the surrounding area.

The integration of Veterinary Clinic RYŚ strengthens LuxVet Group’s presence in northern Greater Poland and represents another step in the consistent implementation of its strategy to build a nationwide network of modern, multi-specialty veterinary facilities.

About LuxVet Group

LuxVet Group is a leading veterinary platform in Central and Eastern Europe, bringing together approximately 80 clinics across the region. Since 2022, the Group has been actively consolidating the fragmented veterinary market and, through rapid growth and a focused M&A strategy, has become the largest veterinary platform in the region.

LuxVet follows a partnership-based integration model, investing in teams, modern equipment, and professional training. Nearly 1,000 medical and non-medical employees have participated in both in-person and online training programs offered by LuxVet.

The Group has also established Veterio, the largest veterinary hospital in this part of Europe, equipped with state-of-the-art diagnostic and imaging technologies. It employs highly specialized veterinarians, including European board-certified diplomates, enabling the provision of veterinary care at a world-class level.

With a strong focus on quality, innovation, and education, LuxVet is helping to shape the future of veterinary medicine in Central and Eastern Europe.
